TO WHOM IT MAY CONCERN

=====

Mr. Ingvar Nielsson provides a range of refrigeration services through his companies but specialises in identifying problems and maximising efficiency in both old and new refrigerating plants. The emphasis is on power reduction, with resultant cost savings, and the simplification of operation with a view to effecting savings in labour.

Furthermore, he has the capacity to carry out such remedial work using his own skilled workforce and achieving the results predicted at the outset.

We have utilised Mr. Nielsson's services with complete satisfaction and can recommend him without reservation.

I.B. CHISHOLM
General Manager
